Street: Patriotske lige 41, 71 000 Sarajevo, BiH

Manuscript No:

Title of the manuscript:

Questions for Reviewer	Yes/No
Has this research been published previously	
Is the referencing correct	
Have any parts from the literature been omitted	
Have the data been analyzed appropriately	

Please using X on the scale your estimate of the value of the elements

	Poor	Satisfies	Good	Very Good	Great
Summary, Introduction, rationale, goal, coverage of relevant literature					
Methods: Is this section transparent and repeatable					
Validity and reliability of variables					
Originality of data					
Presentation of results, clear and concise					
Discussion: are the results explained and do the references follow the Literature section					
Overall rating					

Final decision	
Accepte	
Accepte with minor revision	
Accept major revision	
Reject

Title of the manuscript:

Please rate this manuscript based on the following criteria. Is the manuscript in the top 10%, top 25%, top 50%, or bottom 50% of manuscripts in your discipline area?	Top 10%	Top 25%	Top 50%	Bottom 50%
Contribution to and quality/originality of research scholarship, including clear research questions, concise, relevant literature review; appropriate/innovative methods; rigorous analysis related to research questions and when appropriate, hypotheses.				
Likelihood of research to significantly impact theory and/or practice, including strong theoretical basis, coherent results, strong links to theory/practice.				
Overall quality and readability of the writing, including lucid, easily understood writing; jargon avoided or explicitly defined.				
Impact to the broader field of kinesiology that goes beyond the sub-discipline in which the manuscript was submitted.
